Government of Canada  
Canada Revenue Agency  
Ottawa, ON

Dear Hiring Manager,

My name is Nathan Abbey and I am currently enrolled in my second year at Algonquin College in the Computer Engineering – Computer Science program. I am writing to express interest in the Webb Application Developer (job ID: 24907) position made available through the Algonquin College co-op department.

I would be an ideal fit for this position. The hands-on experience and knowledge this program has provided me with makes me a perfect match for the qualifications listed. I enjoy programming in Java, I have a keen attention to detail, and take pride in all of my work. I am quick and eager to learn. Currently, I am finishing up a placement with the CRA – ITB – Desk Side Support division; and have enjoyed the experience so far. The work culture and professionalism is inspiring. I feel my technical skills and know-how would be better utilized in this position. I would be professional, hard-working, and driven if I were given the opportunity to work for your agency.

The Government of Canada – Canada Revenue Agency is a well-respected institution and seems like an ideal place to gain experience with. Working for a federal agency would provide me with top-notch experience and contacts. An agency which administers tax laws for the Government of Canada is very important; and any opportunity to become more involved with such an agency is very desirable. I have drafted this cover letter specifically for this opportunity

I am very confident in my ability to complete the job given the listed skills needed. I look forward to the opportunity to further discuss my skills, qualifications, or anything else which may come up. I look forward to hearing back from you.

Sincerely,

**Nathan M. Abbey**
